✦ AI powered solution

REX – EXT Energy market place

- ✓ Optimization Engine : Utilizes PyPSA for optimizing renewable energy capacity and cost
- ✓ Parallel Evaluation : Enables multiple wind and solar profiles to be evaluated simultaneously
- ✓ High Accuracy : Ensures capacity optimization accuracy comparable to leading single-profile models in the market
- ✓ Comprehensive Transmission Analysis: Identifies both CTU and intra-State options for the best available combination
- ✓ Integrated Cost Framework :Single-stop access to Open Access Charges, Regulatory Charges, and Tariff Estimates
- ✓ Cost and Curtailment Optimization : Incorporates constraints to minimize costs while optimizing energy curtailment
- ✓ Scalability & Automation : Supports large-scale renewable integration with automated scenario analysis
- ✓ User-Friendly Workflow :Simplifies termsheet closure, tariff negotiations, and compliance management
